WFO Miami Participating in 2010 Miami-Dade County Fair and Expo

The Miami National Weather Service Forecast Office (WFO) is once again proud to be a part of the Miami-Dade County Fair and Expo which runs through April 11th. WFO Miami is a key part of the NOAA exhibit booth located inside Arnold Hall at the Tamiami Park Fairgrounds. The NOAA

booth at the Fair features several large color displays which highlight the different NOAA line offices in South Florida (National Weather Service, Office of Atmospheric Research and Marine Fisheries). Participating at the NOAA booth along with WFO Miami is the National Hurricane Center, Atlantic Oceanographic and Meteorological Laboratory and the Southeast Fisheries Science Center. In addition to NOAA offices, the Miami-Dade Department of Emergency Management is participating by providing informational brochures on hazard preparedness.

Brochures and pamphlets providing information on each of the offices' main duties are being provided, along with computers showing the latest weather information and forecasts for south Florida.

A feature of this year's NOAA display is a tornado simulator where one can see how a "mini-tornado" forms. Also on display at the booth is a large weather balloon tethered to the ceiling.

Staff from each of the NOAA offices in south Florida will also be at the booth to answer questions and interact with visitors.

If you plan on visiting the Fair this year, please make sure to stop by the NOAA booth!
